

# About Pivotal

Pivotal was founded with an aim to change the way of learning. To make learning easy, accessible and fun. We believe tests or exams should give a direction to the future rather than to be used as a tool to measure past. We believe learners should communicate freely among their communities and share as much as possible.

As a leader in providing online learning solutions that support educators in their mission to productively help learners in their educational endeavours, Pivotal is focussed on using technology to promote educational success. Our strong domain knowledge and collective years of experience in the industry, has made it possible for us to understand the intricacies of the learning needs. Our points of differentiation are not just focus and understanding of the education requirement in India, but also our technology-centric approach to help learners, with the right tools, at the right time. We provide specialized assessment solutions and social/collaborative learning solutions, meant for use by individuals, educational institutions and businesses.

The National Science Concours is a unique science contest that enables the students to assess their awareness in Science. With 5320 participants from all over India from various leading schools, the 1st National Science Concours, in 2013, was well-received. Some of the schools like Scindia School, Gwalior, Gopi Birla School, Mumbai, and DPS participated in full strength.

The 2nd NSC was an even bigger success with over 10,000 participants and major schools chains contributing to the cause.

# NSC 2016

National Science Concours is the first of its kind National Online Competition which was started by Pivotal in 2013. NSC is based on the premise that experiential learning (learning by doing) is the most effective form of learning. The NSC was conceptualized to inspire and encourage the younger generation to learn and discover science and its practical usage.

NSC is open for the students from class 6th to 11th.

## Benefits for schools

Schools will benefit tremendously from the students participants.

- ~ Schools will be able to see their performance vis-à-vis other schools. A detailed analysis will be provided to every school.
- ~ All Schools with more than 500 participants will get a certificate as well as momento
- ~ All Schools with more than 900 participants will get a certificate as well as a Shield
- ~ All Schools who have winners, zone wise, will be awarded a certificate and a special shield.
- ~ The Schools can match themselves against other schools.
- ~ Teachers who are nominated as NSC champions will also get certificates.

## Benefits for students

The students of these classes will be able to compete at a national level with their counterparts. They will test and prove their mettle against the best. Most important of all, it is absolutely free of cost. The students are tested on their understanding and skill. They will also be able to share and learn while creating the project and being part of the summer camp.

Understanding through new practical experiences, that is our continuing effort.

The competition is divided into three parts. The first is the online test at national level. The selected students go to the next round where the participants will be required to submit a project. The projects will be critiqued by a renowned panel of science educators and academicians.

Students are awarded on the basis of merit at different levels; State level, Zonal level and at National Level. The participants can see their ranking vis-à-vis other participants. All participants get a certificate of participation for sure. Prizes worth 3Cr will be distributed

Some winners from  
NSC 2014

# Summer Science Camp

NSC Science Summer camp will give kids the opportunity to learn about science through our interactive and hands-on science activities. Our summer science camp will let children become junior scientists for the summer and embark on a series of science adventures!

The Summer Science Camp will be attended by the top scoring students of the NSC. Chosen by an esteemed panel of academicians, these students will experience a one of its kind camp where they will be able to win more prizes.

What the participants will be doing; a small list of activities planned

- ~ Discover cool chemical reactions
- ~ Learn about the stars and constellations by watching the sky at night
- ~ Check out security systems, cool spy equipment, and funky forensic tools that are used in real crime scene labs
- ~ Build their very own working robots, rockets
- ~ Explore rocks and minerals
- ~ Cherish the flora and fauna

What they will learn:

- ~ Balance learning and fun
- ~ Be part of interactive and hands-on activities and experiments
- ~ Operate rain or shine, learn adaptability
- ~ Think out of the box
- ~ Develop the art of observation
- ~ Enhance their curiosity, creativity and persistence

The participants will be guided and helped by renowned names in the Science field. These camps are hosted by trained, reliable, and dynamic instructors who will make it an engaging and rewarding experience.

It's time for kids to celebrate the joys of summer with NSC Summer Science Camp!!
